

# HAL

STAYHOT

## SAY HELLO TO HAL.

Introducing **HAL**—the pioneer among pendant heat lamps, featuring independent controls for heat and light. This simple yet ingenious feature will redefine flexibility and precision for discerning restaurants and hotels, transforming buffet and plating workflows into a symphony of light and warmth.

# THE ORIGIN TALE

Necessity, as they say, is the mother of invention—a principle deeply embodied in our latest product development here at the **Stayhot** factory.

We've often heard from industry professionals about the need for a pendant heat lamp with independent light and heat controls.

Observing the absence of such a product, we saw a rising trend in orders for heat lamps of the same model but with divergent specifications: some equipped with standard infrared bulbs to provide heat, and others with conventional LED lighting, to only provide light. This highlighted a clear preference for design uniformity, even if it meant foregoing the primary function of said heat lamps.

Motivated by these insights, we embarked on a journey to engineer an optimised solution. Fast forward to today and we're excited to introduce **HAL** to the world.

# RADIATING FEATURES

**HAL** is the very first pendant heat lamp on the market to offer separate light and heat controls, resolving the ongoing dilemma for chefs and hoteliers of choosing between light and heat for their buffets and plating stations. With **HAL**, you get the best of both worlds in one package.

Separating light and heat with a simple flip of the switch opens the door to a far more flexible and customisable workflow, tailored to each restaurant and their specific setup.

## Superior Heat

HAL employs a potent 450 W Carbon Fibre Quartz Tube, ensuring the food receives impeccable and consistent warmth. This heat source surpasses conventional infrared bulbs in both longevity and temperature intensity.

## Captivating Light

A custom made, integrated LED ring brings a distinct light source to the buffet and plating station, where the food is clearly put into focus.

## New Rise & Fall Design

HAL sports a brand new rise and fall design, utilising a custom made pull-box wire module that is as visually stunning as it is easily adjustable.

HEAT AND LIGHT  
HEAT AND LIGHT  
HEAT AND LIGHT

H

Heat

With plenty of ambient light already available or when an aura of mystique is desired, the *Heat Only* function will be your weapon of choice.

L

Light

When presenting or showcasing cold dishes, utilise the *Light Only* setting to guarantee optimal illumination, ensuring every detail is vividly and attractively highlighted.

HAL

Heat And Light

The most utilised setting combines the best of both worlds — potent heat meets distinct light with the *Light And Heat* setting.

# THE ANATOMY

## Stayhot Focus Pendant Heat Lamp HAL

### Colour Options

Black

Stainless Steel

### Technical Specifications

Material  
Powder Coated Aluminium, Stainless Steel

Heat Source  
450 W Carbon Fibre Quartz Tube

Light Source  
LED

Colour Temperature  
3000 K

Voltage & Frequency  
230 V, 50 Hz

Dimensions  
Diameter 310 mm, Height 220 mm

Total Retractable Variability  
1200 mm

Engineered with meticulous attention to detail and precision in the heart of Sweden, **HAL** is the epitome of Scandinavian design and innovation.

Don't miss your chance to be at the forefront of this culinary revolution. Hang with **HAL** today and be among the first to experience its game-changing capabilities, elevating your restaurant to new heights.
